

# WORKFLOW FOR EVERYONE EVERYWHERE

ROADSHOW SERIES MARCH 2015

Sydney - 24 March

## Workflow for Everyone, Everywhere ROADSHOW SERIES

Spend a day with Nintex, our customers, partners, and Microsoft to learn how workflow automation can help you make the most of your time.

In today's mobile and cloud-based world, many companies are looking for ways to leverage the new technologies and integrate them with existing tools and processes. This free event will show you how the Nintex Workflow Platform extends your SharePoint investments with workflow and forms designed to be easy, adaptable and accessible from anywhere.

Thousands of customers use Nintex to build forms and workflows that automate everyday processes. This day will illustrate how we help you bring **Workflow to Everyone, Everywhere**.

See how you can:

- Use the Nintex Workflow Platform to **build forms and automate your processes** with a low code approach
- Define a roadmap to **take your forms and workflows to the cloud**
- Bring **workflow and forms to everyone** – on-premises, in the cloud, mobile and social

### SESSION ABSTRACTS

#### YOUR PROCESSES

The Nintex Workflow Platform is designed to manage simple to sophisticated processes. Nintex enables business users, developers and IT Pros to become Workflow Pros and create complete solutions quickly. We'll show how Nintex can solve a wide range of business problems that will improve your organisational results.

#### YOUR CONTENT

Nintex workflows extend well beyond SharePoint documents and lists. The connectors reach line-of-business (LOB) applications, data sources, SaaS offerings, enterprise content management systems, cloud storage providers, social computing channels and more. Our on-premises and cloud offerings mean that you can work in any environment with ease. Work happens everywhere, and processes shouldn't be confined to a single application. You'll learn more about the extensibility of Nintex and the power of information access, both on premises and in the cloud.

#### YOUR USERS

Improve engagement from your customers and employees by creating rich experiences that improve their productivity. Reach them where they already work – in a mobile, social and cloud world.

### Catholic Education Automates Compliance with Nintex Workflow

*Presented by: Angela Bowman, Knowledge Management Officer, CEDP and John Ackery, Director, Devworkz*

Catholic Education Diocese of Parramatta (CEDP) runs 56 primary schools and 22 secondary schools, and four early learning centres in western Sydney. Using Nintex Workflow, CEDP has transformed a manual auditing register and army of spreadsheets into an online rules-based system where collaboration, transparency, and shared leadership are underpinned by school-level tracking, automation, and organisational learning. Learn more about the "247Checklist" program from concept to implementation from CEDP and Devworkz, and how Nintex Workflow has enabled the automation of critical operations and business systems. This session will also include a live demonstration.

## Mobile Productivity – Be Productive, Anywhere

Presented by: Steven Miller, Business Group Director, Microsoft Office Division, Microsoft Australia

For years, companies have leveraged Microsoft solutions for their productivity needs. In an evolving cloud-first and mobile-first world, organisations can continue to trust Microsoft and its valued partners such as Nintex, to provide the richest productivity solution across virtually any device in a secure, enterprise-grade way.

## Best Practices from a SharePoint MVP

Presented by: Elaine van Bergen, Microsoft SharePoint MVP, MCSM

SharePoint, while a great platform, has many different options that can be used to achieve the same business goal. As that gets extended out to Office 365, this increases exponentially. This session will focus on some of the tips, tricks and patterns that help avoid issues in a typical SharePoint implementation. It will also discuss key areas and decision points that help an organisation choose between on-premises, Azure, or Office 365-based implementation, including relevant considerations for each.

## Streamlining processes at UNSW Business School using Nintex Workflow and Forms

Presented by: Ricky Barclay, Intranet Manager, UNSW Business School and Yugan Yugaraja, Senior Consultant, Empired

The UNSW Business School has commenced a journey to streamline many of its paper-based processes across its disparate groups and functions. In particular, the paper-based process was impacting the HR function as paper forms could be misplaced, with the hiring manager and HR not being able to track the status of a request. Via a joint project, the Business School's Marketing, ITS, and external vendor, Empired, Nintex Workflow and Nintex Forms were chosen in conjunction with SharePoint 2013 to create an automated process and enable the university to employ the correct staff in a timely manner.

## AGENDA

TIME	SESSION	PRESENTER
8.30 - 9.00am	Registration
