### “Building Digital Workplaces with Bonzai & Office 365”

This interactive session will equip you with the know-how to build an effective digital workplace that integrates with any third-party tool. You'll learn how Bonzai can help you build a digital workplace on SharePoint and Office 365 that will be at the heart of your organization. Michal will highlight key elements required to create great digital environment including:

- The ability to target information to select groups of people such as news, events, documents, and applications
  - Social features to garner engagement on corporate communications, blogs, and announcements
  - Robust employee directories so users can search and connect based on skills, interests, and expertise
  - An intuitive user experience for access on any device and at any time to work remotely
  - Branding and design flexibility to align the digital workplace to your corporate identity
- 

### “Unlocking the Power of Office 365 with Profiles”

Join Jeremy Thake from Hyperfish to understand why profile information in Office 365 is critical to the modern workplace.

In this presentation Jeremy will:

- Highlight how Hyperfish can ensure complete and up-to-date profiles
  - Demonstrate how this enhances the out of the box SharePoint People search and advanced Bonzai Intranet for Office 365's employee directory
  - Share with you the advanced discovery scenarios he sees in customers that ensure organizations get the most out of their employees
-

## "Intelligent Process Automation with Nintex"

Join Mike Fitzmaurice, Nintex Vice President of Workflow Technology, to learn how to transform a place where work gets *put* into a place where work gets *done*. Office 365 tenancies can bring together people, teams, knowledge, and applications, but it's workflow that translates information into action, and changes the nature — not just the location — of digital work.

Fitz will show you how to:

- Use documents and list content to spawn reviews and carry out instructions
  - Automatically generate document content for collaboration or presentation
  - Simplify user participation in business processes with forms (web and mobile) that work hand-in-hand with intelligent process automation
  - Monitor and manage both the efficacy of individual processes and the overall usage of workflow technology across an entire tenancy
- 

## "Democratize Office 365 Management in a Digital Workplace"

Join Benjamin Niaulin from Sharegate to discuss Office 365 management. With Office 365 Groups bringing in a new way to work in our Digital Workplace, we can't forget about IT's role in this change. How can we lead the change from Classic IT to Modern IT?

Here's what we'll discuss:

- Problems the Digital Workplace model brings up for IT
- What's available for you to manage Office 365
- How can Sharegate help you Democratize Office 365 Management
